Enhancement in POS.....	3
Issue Fix.....	

Release Date: 08/10/2020

Release Version: 2.1.24 (1.3)

**Enhancement:**

In POS,

**1) Sorting of customer names in BarTab:**

- User can sort BarTab orders in A-Z, Z-A manner based on the customer name.
- Users can sort orders using the alphabet chosen.

**Screen Layout:**

**2) Primary and secondary language for the receipt print:**

In Back office,

Page Navigation: My Stores >> settings >> Printer Configuration >> Front end receipt

- An option Primary and secondary language is included.

In POS,

- If user enable the corresponding back office option, then system should print both in English and selected language in hardware settings

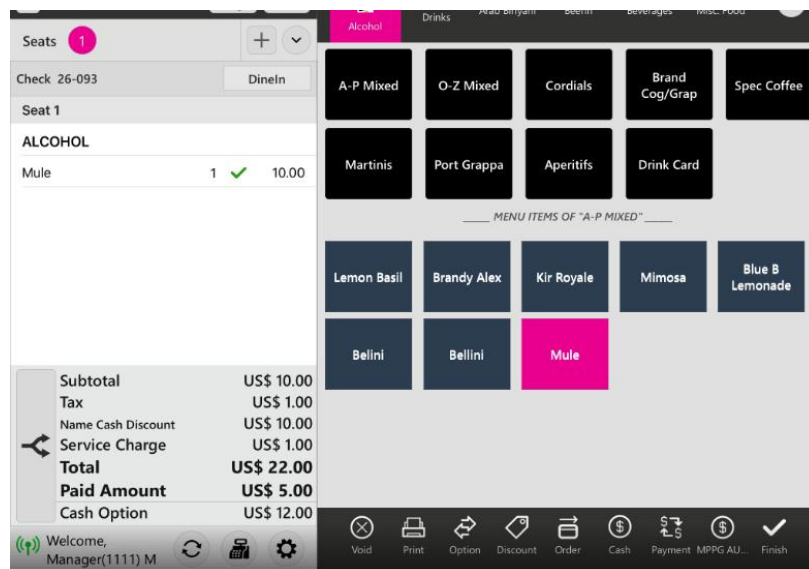

### 3) Menu Item and Modifier print for the Online order sale:

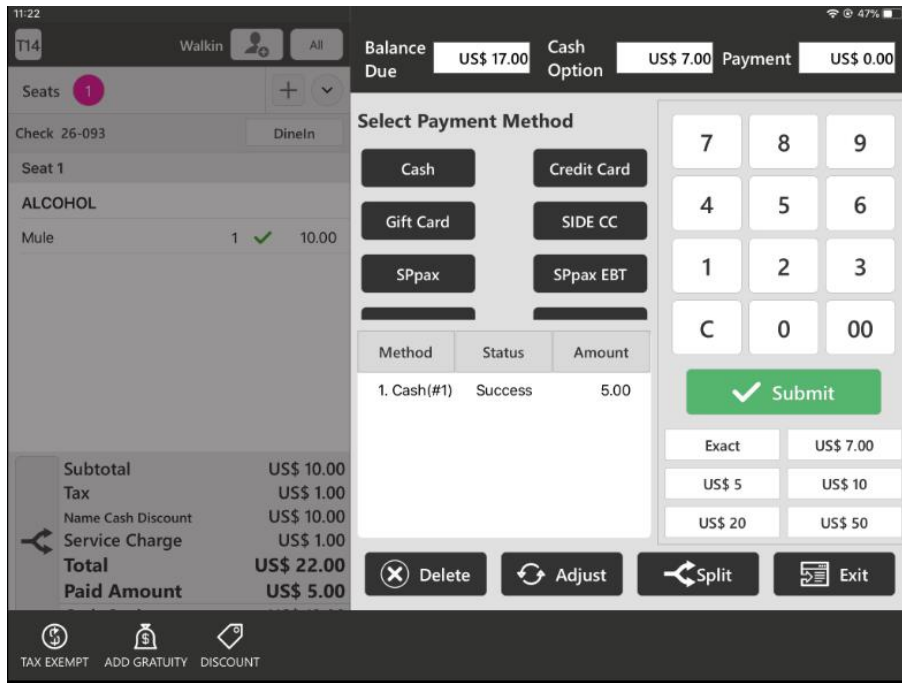

- The menu item and the modifier should be printed on the respective assigned printers.
- The modifiers should be printed in the printer assigned to them.
- In Menu print, the modifiers will be displayed if the option Show Modifier in Menu Print is enabled on the Modifier screen.
- In Modifier print, the menu name will be displayed if the option Show Menu item in Modifier Print is enabled on the Modifier screen.
- In case the modifier is not mapped to any of the printers, then the respective modifier will be printed on all printers.
- The above changes will be applicable only for the kitchen print.

Menu/Modifier	Assigned Printer
Burger	P1
Onion Rings	P2
French Fries	P2
Salad	P3
Tomato	No printer

### 4) Cash option display feature for payment:

- If cash discount is configured in the back office, the details should display in the POS as cash option.
- The payment screen should show the values for cash option payment and also the other payment value.
- The payment screen should show the cash option payment values as well as the other payment value.
- The balance due should be updated with the other payment value in case of partial payment.

### 5) Menu and Modifier print for KDS:

- Both the menu and the modifier can be printed in different printers based on printer assignment.
- The modifiers should be printed in the separate printers if assigned.
- The menu items should be printed in the assigned menu print and the modifiers should be printed in the assigned modifier printer.

### 6) Service type source included in the receipt, label, and kitchen print:

- The receipt, label and kitchen print should contain the service type source from which the orders are incoming.
- If it is online order then printer should include the source like call centre, mobile order.

### Issue Fix:

- 1) The consolidation of menu items in kitchen receipt from online order is fixed.
- 2) **Issue ID 65361** – Unselected modifiers are not printing in kitchen print for conventional view is fixed.
- 3) **Issue ID 66724** – Order button does not print labels for future online orders is fixed.
- 4) **Issue ID 61344** - The default card name display as “Sean Connery” is fixed and changes to generic field.
- 5) **Issue ID 69329** – The service charge displayed instead of cash discount in the receipt is fixed.
- 6) **Issue ID 69206** – Missing of void by employee name in the void report is fixed.
- 7) **Issue ID 69174** – Modifier re-routing on KDs feature is enhanced.
- 8) **Issue ID 67518** – Modifier kitchen print routing for online order is fixed.
- 9) In Employee Role-based payroll reports, the Credit card tip is not showing when the employee completes the payment for online order check through MPPG/GC/CC is fixed.
